

From the file menu, select File → New → Other Accounts. And Next "Next"

The screenshot shows a dialog box titled "Account Wizard" with a close button (X) in the top right corner. The main heading is "New Account Setup". Below the heading, there is instructional text: "In order to receive messages, you first need to set up an account. This Wizard will collect the information necessary to set up an account. If you do not know the information requested, please contact your System Administrator or Internet Service Provider. Select the type of account you would like to set up:". Below this text is a radio button selection area with the option "Newsgroup account" selected. At the bottom of the dialog, there are three buttons: "< Back", "Next >" (which is highlighted with a blue border), and "Cancel".

Fill in the screen that is shown below.

The screenshot shows a dialog box titled "Account Wizard" with a close button (X) in the top right corner. The main heading is "Identity". Below the heading, there is instructional text: "Each account has an identity, which is the information that identifies you to others when they receive your messages. Enter the name you would like to appear in the 'From' field of your outgoing messages (for example, 'John Smith')." Below this text is a label "Your Name:" followed by an empty text input field. Below that is another instruction: "Enter your email address. This is the address others will use to send email to you (for example, 'user@example.net')." Below this text is a label "Email Address:" followed by an empty text input field. At the bottom of the dialog, there are three buttons: "< Back", "Next >", and "Cancel".

Account Wizard ×
